## Let's recycle

FOR six months beginning March 26, 44,000 students in the Klang Valley will be encouraged to collect used Tetra Pak cartons in special recycling bins provided at their schools.

The project, carried out under the "Nature for Nature" programme, aims to instil love for the environment among children at 25 primary schools.

Organised by Tetra Pak (Malaysia) Sdn Bhd with the cooperation of the Forest Research Institute of Malaysia, the programme was recently launched by the Education

Ministry's principal assistant director (Counselling Management and Discipline Sector) Mohd Anuar Abdul Hamid.

Various activities will be organised, including a mini carnival and contests on recycling, to educate students on renewable energy sources and provide tips on how to save energy, Mohd Anuar told reporters at the launch held at SK Bangsar, Kuala Lumpur.

The school which collects the most number of Tetra Pak cartons will receive gifts worth RM60,000, he added. — Bernama
