Dynamic graduates

ALFA International College takes pride in producing dynamic graduates who are visionary thinkers and independent go-getters with the ability to articulate their vision through various channels of communication, either through verbal or visual presentations as well as written briefs.

ALFA brings out the best in their students through its culture of creativity and innovation.

ALFA immerses its students in an environment where they are continuously challenged to perform beyond conventional limits to find solutions to real life problems. Through collaborative projects with industry partners, ALFA ensures that students can relate what they are learning to the demands of reality.

A recent ALFA student project is a collaboration between the Malaysian Association of Creativity and Innovation (MACRI), the Forest Research Institute of Malaysia (FRIM) and the National Science Centre (PSN). This project was staged in conjunction with ALFA's Creativity and Innovation Week with the theme, "Exploring New Possibilities."

Under the guidance of Prof Dr Jimmy Lim, advisor to the School of Architecture, ALFA students showed that it was possible to construct a modern multiple-storey building using a bamboo frame structure.

This innovative building design was both eco-friendly and cost-effective as well as offering a sustainable alternative to conventional building methods.

ALFA students also get to participate in numerous competitions and workshops, pitting their creativity and innovation against oth-

ers and frequently emerging victorious.

For five consecutive years since 2003, ALFA students have been placed in the top three positions at the National Architectural Student Workshop, an annual event organised by the Pertubuhan Arkitek Malaysia (PAM).

The event showcases the works of Malaysian architecture students from public universities and private institutions of higher learning.

Lecturers play an important role in instilling creativity and innovation.

ALFA lecturers are committed to nurturing creative minds, by encouraging students to see possibilities and pursue them with passion and above all, to have a thirst for knowledge and learning as well as the desire to improve.

ALFA International College offers diploma programmes in

Architecture, Interior Architecture, Graphic Design and Multimedia Design.

It is currently accepting students for the June intake. Call: 03-7873 8288 or email: enquiry@alfa.edu.my. Website: www.alfa.edu.my. College Open Days are on June 6 and June 13 from 10am to 6pm. Registration Week is from June 8 to June 13.
