Frim green event on Sunday

THE Forest Research Institute Malaysia (Frim) in Kepong is organising a Green Fest on Sunday to mark World Environment Day so as to promote and create more awareness about environmentally friendly lifestyles.

Various activities have been lined up for children, youth and parents from 8am to 3pm to give an insight into the ways to "Go Green, Live Green" in a fun way.

Among the activities are the promotion of recycling as a way of

life, learning more about the research work Frim scientists do, as well as the conservation work of the World Wide Fund for Nature (Malaysia) and the Malaysian Nature Society.

There will also be car boot sales of used house-

hold items, tree climbing demonstrations, guided tour along various Frim nature trails, canopy walk, face and T-shirt painting and colouring contests for children, besides entertainment provided by TV3 and Suria FM. — Bernama
