A large photograph of a person walking across a rustic wooden bridge in a dense, lush forest. The bridge is made of thick logs and branches, and the surrounding area is filled with green foliage and tall trees. The scene is bright and natural.

**Green Oasis**

HIKERS and joggers regularly flock to the Forest Research Institute Malaysia (FRIM) to escape the hustle and bustle of the city.

Located at the outskirts of Kuala Lumpur, FRIM was set up for scientific study and forest conservation. It is also well-known for its nature trails and canopy walkways.

The forest reserve, which is also a popular picnic camping and family outing site, gets up to 300,000 visitors each year.
