Herbs that help cancer treatment

KUALA LUMPUR: A study conducted by the Forestry Research Institute of Malaysia (FRIM) over the past two years has found several herbs that can help in cancer treatment.

FRIM director-general Datuk Dr Abd Latif Mohmod said although the findings had yet to be finalised, the study revealed that cancer cells could be killed with the use of a combination of certain herbs.

"If everything goes as planned, the findings of the study will be presented in June next year," he told reporters after the opening ceremony on the 14th Medicinal and Aromatic Plants Seminar (MAPS14) at FRIM here.

The ceremony was officiated by the Deputy Natural Resources and Environment Minister Datuk Hamim Samuri. – Bernama
