Branch Background & Services provided: Latar Belakang Cawangan & Perkhidmatan yang ditawarkan:

Herbarium Background

The Kepong Herbarium (KEP) was first established by Alfred M. Burn-Murdoch in the early 1900s. As an internationally recognised herbarium, it houses about 300,000 specimens with over 770 types. This enables the herbarium to provide the leadership for research on plant biodiversity and maintain a plant reference centre for the nation. Our specimen collection continues to grow through expeditions, gifts and exchanges with other institutes at home and abroad. We are leading a number of national floristic projects including the Tree Flora of Malaya, Tree Flora of Sabah and Sarawak and Flora of Peninsular Malaysia. The herbarium has produced a number of standard manuals for plant description, identification and floristic monographs, e.g. Dipterocarpaceae of the Malay Peninsula, Foresters Manual of Dipterocarp, Tree Flora of Malaya, Tree Flora of Sabah and Sarawak and Flora of Peninsular Malaysia. The herbarium also provides an important service for plant identification for both native and exotic plant species of Malaysia to both the public and private sectors.

No.	Services	Charges	Duration (Working days)
1.	Leaf samples sent to FRIM for identification	RM100.00 per sample	2 weeks for dried specimens 3 weeks for wet specimens
2.	Field Identification outside FRIM (Other expenses required follow government rates, e.g. travel, hotel, food, etc. are borne by client)	RM150.00 per tree	2-3 weeks (depending on field location, size of covered area and number of trees)

Latar Belakang Herbarium

Herbarium Kepong (KEP) telah ditubuhkan oleh Alfred M. Burn-Murdoch pada awal 1900-an. Sebagai sebuah herbarium yang dikenali di peringkat antarabangsa, KEP menempatkan kira-kira 300,000 spesimen dengan lebih 770 tip. Ini melayakkan herbarium ini menerajui kajian terhadap kepelbagaian tumbuhan dan bertindak sebagai pusat rujukan berkenaan tumbuhan di negara ini. Bilangan koleksi spesimen di KEP semakin meningkat melalui ekspedisi, hadiah dan pertukaran dengan institusi-institusi lain di dalam dan luar negara. Kami di KEP mengetuai beberapa projek floristik kebangsaan termasuk Tree Flora of Malaya, Tree Flora of Sabah and Sarawak dan Flora of Peninsular Malaysia. Herbarium ini telah menghasilkan sebilangan manual standard bagi penghuraian dan identifikasi tumbuhan serta monograf floristik, contohnya Dipterocarpaceae of the Malay Peninsula, Foresters Manual of Dipterocarp, Tree Flora of Malaya, Tree Flora of Sabah and Sarawak dan Flora of Peninsular Malaysia. Herbarium ini turut menyediakan servis penting identifikasi tumbuhan bagi spesies tumbuhan asli dan eksotik di Malaysia kepada kedua-dua sektor awam dan swasta.

No.	Perkhidmatan	Kadar Bayaran	Jangkamasa (Hari bekerja)
1.	Sampel daun dihantar ke FRIM untuk pengecaman	RM100.00 setiap sampel	2 minggu untuk spesimen kering 3 minggu untuk spesimen basah
2.	Pengecaman di lapangan di luar FRIM (Perbelanjaan lain seperti pengangkutan, bayaran hotel, elaun makan dan sebagainya adalah tanggungan pelanggan mengikut peraturan Kerajaan)	RM150.00 setiap pokok	2-3 minggu (Tertakluk kepada lokasi, keluasan kawasan dan bilangan pokok)

What you need to do?

- Leaf sample needs to be sent in complete form, with leaf attached to twigs with/without flowers/fruits
- Incomplete leaf sample, e.g. with only one leaf, will be rejected
- Kindly discuss with the officer-in-charge for the services needed
- The report will be prepared within 14-21 working days after full payment has been made.

Apa yang anda perlu lakukan?

- Sampel daun perlu dihantar dalam keadaan yang lengkap dengan ciri-ciri daun dan ranting dan/atau berbunga/berbuah
- Sampel daun yang tidak lengkap, contohnya hanya mempunyai sehelai daun sahaja tidak akan diterima
- Sila berbincang dengan pegawai yang bertanggungjawab untuk perkhidmatan yang diperlukan
- Laporan akan disediakan dalam tempoh 14-21 hari bekerja selepas bayaran penuh diselesaikan.
