The environment is big news these days—climate change, sustainability, recycling (aka the 3Rs—reduce, reuse, recycle) and biodigester are some of the buzzwords the majority of newspaper readers know. But back in the 1970s and 1980s, the local media hardly gave much attention to stories that touched on the environment. Yes, basic issues like garbage and sewage were covered, but nothing more complex like climate change and losing biodi-
