FRIM against proposal to turn forest into highway

The Forestry Research Institute of Malaysia (FRIM) today firmly opposed the proposal to turn the Cawang forest into a highway.

"We want to preserve the forest land for the benefit of the future generation," said the Director General of FRIM Dr Mohd. Mustafa Ali.

FRIM has proposed that the state government do a feasibility study on the proposed highway that will impact the area.

"It will be a major project that will affect not just one area but the whole state," said Dr Mustafa.

FRIM will continue to work closely with the state government to ensure that the Cawang forest is preserved.

FRIM has always been a leader in environmental protection and will continue to play a vital role in preserving the natural environment.

"We hope the government will listen to our concerns and take the necessary steps to protect the forest," said Dr Mustafa.

FRIM is dedicated to preserving the natural environment and will continue to work towards this goal.

FRIM will continue to monitor the situation and will provide updates as necessary.
